Anuket CI/CD Transformation

Trevor Bramwell

LF NETWORKING

Introduction

› Started with LFN Infra-WG

    › Research and evaluation done by LF IT

› TSC agreed to move toward GitLab in February 2021

› Migration put on-hold due to EasyCLA and pending release

Context

What are the benefits?

- › Developer experience
  - › CI lives with code
  - › Familiar experience for new users coming from GitHub/GitLab
  - › Can help attract developers by reducing barrier to entry
- › Platform Tooling
  - › Security, dependency, and licence scanning
  - › Container and Package repositories, HTML hosting
- › Cost savings
  - › Minor pass-through savings on hosting

FAQ

› Who is doing the work?
  › LF IT will be converting project CI from Jenkins to GitLab
› How will it impact my project?
  › Should not impact current development
  › Effort will run in parallel with feedback from projects
› How do I get support?
  › LF IT will interface with GitLab. Current support process stays the same.

Next Steps

Ask to TSC

› The TSC agrees to follow the 2021 TSC's decision to move to GitLab
  › https://wiki.anuket.io/display/HOME/2021-02-23+TSC+Agenda+and+Minutes
