

Collaboration Plan with Mindspore

In the previous weekly meeting, we've invited Zhipeng Huang , the project leader of Mindspore, to introduce and discuss the Mindspore AI framework. The follow-up cooperation plan would be as follows:

- **AI Framework Support:** consider Mindspore's AI open source framework capabilities, it is recommended to use Mindspore as one fo NICIP cooperation AI frameworks.
- **Data Storage Support:** we can consider using Huawei Cloud to store out training and testing data.
- **Computing Power:** they may can provide some computing power support, we can discuss with them.
- **Others,** welcome put forward more suggestions.
