

# Brahmaputra Release Planning

Debra Scott

# Scope

Communication

# OPNFV Brahma Putra Release Planning Communication

- Communications Proposal for Requirements:
  - Use Project Box for easy visual communication of high level prioritized requirements (sample in next slide)
    - Debra to build & maintain with help of project leads
  - Use Spreadsheet or wiki for detailed requirements descriptions as needed for engineering level
  - Use Jira to track specific tasks as they are being completed

## Sample Project Box

# Project Name

Target release date

### Minimum Viable Req's

The project will not release without these being complete. It can't be successful if they are not delivered

### Want but at Risk Req's

These are items the team would like to include but a significant level of risk exists to execute on them.

If the risks are not resolved they move to **outplan** at milestone C; if risks are reduced, they move to Working Plan

### Working Plan Req's

These would be MV except there is some level of risk that must be resolved and an acceptable work around exists. The team will work as if they are in plan. If the risks are not resolved by milestone D they will move to **outplan**.

### Outplan Req's

The team will not expend energy on these items

Vehicles

## Milestone Definitions

### Brahmaputra-Release milestones

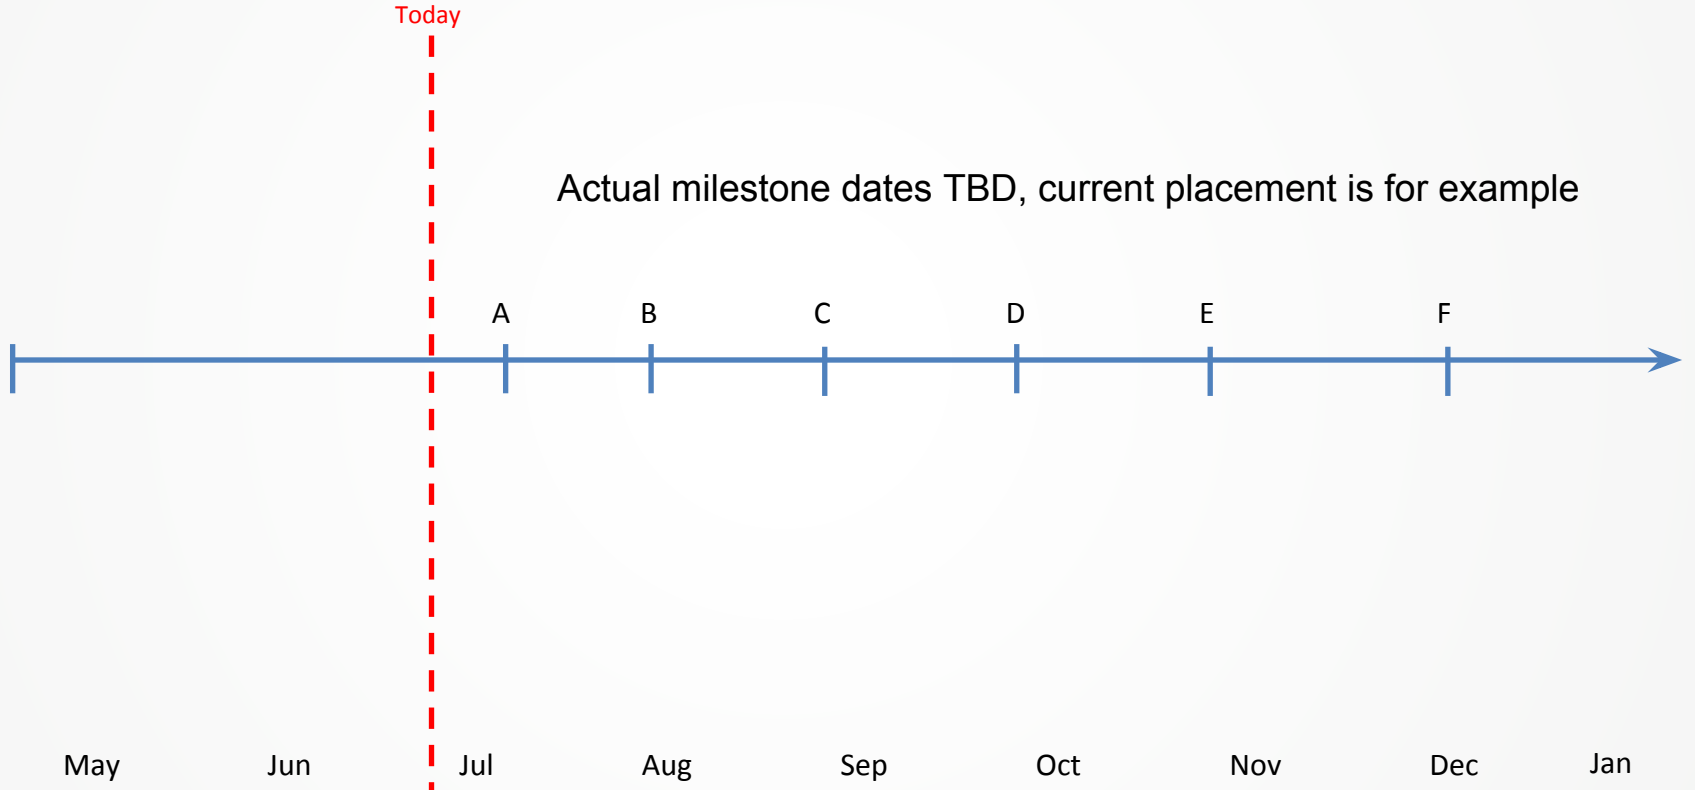

- Milestone A - statement of intent Brahmaputra Release participation
- Milestone B - Per project plan for the Brahmaputra Release
  - Features and dependencies identified in Jira
  - If a project wishes to join between this milestone & milestone C they must go through an “exception” process and demonstrate that they have completed the requirements of this & all previous milestones as well as that they have the ability to meet all future milestones
- Milestone C - Sprint planning ready (critical Jira tasks written)
  - Requirements projects: All upstream requirements published
  - Deploy toolchains: All integrated components identified and planned
  - Testing projects: All features identified and test specifications ready
  - Infrastructure projects: All dependencies identified and planned
  - Project entry freeze
- Milestone D - Feature and API freeze
- Milestone E - Code freeze - documentation complete
  - Requirements projects: Upstream development complete
  - Deploy toolchains: Integration features complete
  - Testing projects: Test cases complete
- Milestone F - Release candidate and release activities.

# OPNFV Brahmaputra

## Milestone Schedule OPNFV

Today

Actual milestone dates TBD, current placement is for example

2015 May

Jun

Jul

Aug

Sep

Oct

Nov

# Risks

# Risks Need to be Identified and Qualified

Simple list to track- everyone contributes

Risk Description	likelihood of occurrence	Impact if occurs	trigger	mitigation plan	contingency plan	owner	status
	H-M-L	H-M-L		avoid	reduce impact		

## Quadrant System to Prioritize

Thanks
