OPNFV Hosting Options

› Note that these are still in discussion within the OPNFV TSC in terms of pros/cons and full pricing:

› Problem Statement: OPNFV UCS Lab Hardware in PDX data center is obsolescing and not under support contract

› Option 1: No Change

  › Option 1A: Purchase a hardware support contract

› Option 2: Purchase new hardware and keep existing PDX co-lo services

  › Option 2A: Solicit member donations for new hardware

› Option 3: Decomission part of PDX lab and move to a bare metal as a service as provided by Packet.net

› Note: There are also Intel donated machines in the PDX data center that would remain untouched under all these options
