LF Jenkins and Orange Jenkins responsibilities

LF Jenkins (jenkins.anuket.io)

Main objective:
- Job sanitation
- Verify

Key Responsibilities:
- Configuration and maintenance of Jenkins Verify server
- Manage Jenkins plugins, updates, and integrations with other tools
- Create and manage Jenkins jobs, pipelines, and build configurations in Global JJB (for verify jobs)
- Collaborate and maintain Jenkins Verify JJB jobs
- Troubleshoot and resolve pipeline issues
- Implement security best practices for Jenkins
- Monitor Jenkins performance

Main Maintainer >> LF Releng (support@linuxfoundation.org)

Orange Jenkins

Main objective:
- Build Server

Key Responsibilities:
- Configuration and maintenance of Jenkins Build server
- Manage Jenkins plugins, updates, and integrations with other tools
- Create and manage Jenkins jobs, pipelines, and build configurations
- Write and maintain Jenkins pipeline scripts
- Troubleshoot issues related to builds, deployments, and infrastructure
- Maintain clear and up-to-date documentation of Jenkins configurations and processes
- Create user guides and best practice documents

Main Maintainer >> Cedric (cedric.ollivier@orange.com)

Notes.

Logs public, min of 6 months, to have voting power.
Functest build in orange one.
Artifacts should be pushed with LF Jenkins due to validation and support.
Maintenance Deadlock if Cedric leaves.
