Agenda and Minutes

1. Agenda Bashing
2. Release information
3. NG.133 GSMA edition
4. Next Meetings
5. AOB

Release information

- Moselle release approved on June 21
- Nile:
 - Kickoff: August 2
 - Release definition: August 16
 - Release scope: September 6 , scope to be defined after GSMA's edition completion

Actions for GSMA document edition

- RA1 latest pdf file automatically built (July 20th): [anuketopenstackbasedreferencearchitecture2022July20.pdf](#), no newer version generated
- Identified issues when going through the pdf:
 - Reference Model references: text not explicit to be changed and reference to GSMA document to be added
 - Links to tables not working
- Bibliography/References: bibtex formats. Issue with pandoc, the references are at the end of the pdf doc, not in chapter 1 References section.
- Glossary/Terminology: we will keep the glossary section, it will be renamed terminology to follow GSMA rules. 2 options to create the glossary (explicit glossary in chapter1 or tag file). Wait for Cédric to chose the best option.
- Terminology: check which of the terms coming from Anuket common glossary are really used in RA1 doc and update if terms are not defined. geometry flavor not used will be removed.
- Abbreviations section to be added into chapter 1: it can be based on the table in NG.133 v1
- What remains to be done?
 - RC1 content to be added
 - Cover page to fit GSMA
 - GSMA template
 - ToC on 3 levels
 - RM references
 - Review of Chapter 1.4 Principles and 1.5 Organisation
