- [Build server management](#)
- [Anuket budget for 2023](#)
- [AoB](#)

Participants

1. [Gergely Csatari](#)
2. [Scot Steele](#)
3. [Cedric Ollivier](#)
4. [Beth Cohen](#)

Antitrust policies

- [Linux Foundation Anti-Trust Policy](#)
- [GSMA Anti-Trust Policy Notice](#)
- Recorded Policies:
 - <https://zoom.us/rec/play/uMAuluyogG43EtWS4QSDAf4oW9XsKP2s1CQW-fYNzXu3VSiGN1L3Z7YSNOX-H7MYUyogBulNABoVavXq?autoplay=true&startTime=1589371628000>

Build server management

- Matt Watkins <mwatkins@linuxfoundation.org> was not able to join due to the short notice
 - [Cedric Ollivier](#) to start a mail summarizing the problem
 - [Cedric Ollivier](#) will initiate discussion in LFN TAC
- Problem
 - Anuket build servers are outdated
 - Build servers should be updated on a regular basis
 - Valid also for ONAP and ODL
 - Some Anuket jobs rely on the global GCP account
- Solutions
 - LF IT proactively updates the build servers
 - Based on what policy?
 - What is the effect of this to our budget?
 - Can Fabio do this for us? ([Sandra Jackson](#) to ask)
 - Anuket contributors get root access to the build servers
 - Who is responsible if something goes wrong?
 - LF IT updates the build servers based on tickets
 - This is the current method what lead to very outdated servers

Anuket budget for 2023

Category	Change from 2022 Same \$/ More \$ / Less \$	Pri ori ty H / M / L	Notes, Explanations, etc.
Infrastructure requests	Same		
LF IT support (releng, sysadmin)	Same		We plan to manage the build servers by the community what would mean reduction in LF IT costs, but requires and agreement between the community and LF IT.
Community Awards /Recognition	Same		
Mentorship Program	Same		Currently 1 person and important to the overall LFN mission.
Staffing (TPM, ReIMgr, etc.)	Less		We plan to take the ReIMgr role into the community, but would still need support from David for a transient period. In case of any budget reduction, maintenance is considered as prioritized compared to release management which is being decreasing anyway.
