 - must find out formatting gotchas from RA1 experience
 - will schedule ad hoc workshop with [Karine Sevilla](#) [Cedric Ollivier](#) and [Pankaj Goyal](#)
 - [content Nile might be fine - O release better](#)
 - intention is to generate doc automatically from the beginning

todo: check GSMA document format

reorganise structure - bibliography

restructure chapter 1 - add principles terminology and abbreviations

remove links to cntt.common-copy whatever content to the ra2 file itself

in general, follow structure of GSMA doc

pdf document not allowed, has got to be word!

add refs.bib bibliography - all documents and URLs! - URGENT

replace references to :cite:

the result is that the only :ref: left are the ones to other chapters of the document

add template docx - can be same as ra1 - ask Javier what output they expect, the pipeline output might be enough

if ok, then use pipeline output

otherwise, add GSMA-specific stuff to template

all tables should be list-tables (should be done already)

pipeline - check ra2 pipeline, should generate docx every time
