

2021-02-11 - [Anuket RA2] - Meeting Agenda and Minutes

Attendees:

[Riccardo Gasparetto Stori](#)

[Peter Woerndle](#)

[Karine Sevilla](#)

[Suman Kumar](#)

[Anurag Singh](#)

Agenda and Minutes:

- Antitrust notices
 - [Linux Foundation Anti-Trust Policy Notice](#)
 - [GSMA Anti-Trust Policy Notice](#)
- Walk-in items
 - New mailing list: <https://lists.anuket.io/g/ra2>
 - Calendar items will be cancelled in previous ML and have been recreated in this new one
 - New wiki (for diagrams, meeting notes, etc.): [RA2 - Kubernetes Reference Architecture](#)
- AOB & Project review
 - <https://github.com/cnnt-n/CNTT/projects/10>
- Permanent FYI
 - CNF Working Group within CNCF - <https://docs.google.com/document/d/1YFimQftjkTUsxNGTsKdakovP7cJtJgCTqViH2kwJOrc/edit>
 - This also incorporates the previous requirements gathering exercise
- Actions/Next steps
 - [PR2252](#): User IDs should be scoped under namespaces, in addition to global UIDs.
 - Release numbering - RA2 release should be numbered as 4.1 to align with RM releases. PR2247 has a change to 5.0, but that would imply alignment with RM 5.0, which is not the case yet => leave 4.1
 - Backlog cleanup of stale issues -
 - RM 5.0 alignment - [Riccardo Gasparetto Stori](#) to breakdown delta in RM into separate atomic issues
 - [Suman Kumar](#) to have a look at [issue 2189](#) on SFC relevance for RA2
 - [Riccardo Gasparetto Stori](#) to change Network Resiliency requirement to include only what's in scope for RA2
 - Issue 2124 to be closed or changed to ch04-grade spec (as opposed to solution design requirement)
 - Issue 2030: immediate approach would be to **highlight** the verb in the current ch4 description. Alternatively, adding a column with a boolean for mandatory requirements, or even adding a new page with the same info and fields.
