2018 Goals Working Groups

How to proceed/accelerate on this? Proposal: start a number of "TSC task forces" (covering the obvious topics) to work things out more and recommend TSC-level action if needed.
1. Identify activity buckets

- Release process based on CD - details, timing, transition plan tapio, timirnich,

- Strategic evolution plan for OVP fuqiao rossella_sKubi

- Edge - hardware scenarios, stacks (Akraino, OpenStack Edge, more?) fuqiao Trevor Cooper Julien

- Cloud native, K8s & related components Wenjing Chu rossella_s Brian Skerry Julien

- Collaboration with other LFN & other projects (e.g. for infra) Fatih, Frank

2. Identify 2-3 TSC members as drivers per bucket - no hangarounds please, teams will provides updates in TSC frequently
3. Clarify/flesh out objectives as needed
4. Recommend way forward - new projects needed, which projects to involve (in which role) - let's not get in the way of already executing projects but identify what is missing and where help or coordination is needed.

- Cloud Native
- Collaboration with Other LFN/non-LFN Projects
- Edge Cloud
- Release Process Based on CD
- Strategic Evolution Plan for OVP
