About Anuket

Mission/Scope

Mission Statement: Empower the global communications community by creating and developing reference cloud infrastructure models, architectures, conformance programs and tools to deliver network services faster, more reliably, and securely.

Scope:

Anuket develops open reference infrastructure models, architectures, tools, and programs. Open source software developed within the project will leverage OSI-approved licenses, while documentation, including specifications, will leverage open licenses. The scope of the project includes but is not limited to:

- (a) Enabling member communities to align on reference model, architecture and implementation requirements and specifications for cloud-based communications infrastructure and workloads
- (b) Supporting open source and open standards communities in the ecosystem,
- (c) Developing an integrated, tested, and validated open software reference infrastructure (including interfaces to hardware), with tools of its own design and from upstream testing projects,
- (d) Helping design a conformance framework and validation programs,
- (e) Contributing to and influencing upstream projects leveraging the reference infrastructure,
- (f) Creating new open source components within the reference infrastructure where needed,
- (g) Supporting ongoing strategic activities and evaluating emerging technologies to foster continued deployment success.
