2021-04-15 - [Anuket RA2] - Meeting Agenda and Minutes

Attendees:

- Riccardo Gasparetto Stori (Vodafone)
- Pankaj Goyal (AT&T)
- Suman Kumar (Samsung)
- Cedric Ollivier (Orange)
- Gergely Csatari (Nokia)
- Petar Torre (Intel)
- Karine Sevilla(Orange)
- Peter Woerndle (Ericsson)

Agenda and Minutes:

- Antitrust notices
    - Linux Foundation Anti-Trust Policy Notice
    - GSMA Anti-Trust Policy Notice
- Walk-in items
    - PR 2355: Require Node Feature Discovery and Device Plugins
        - content is ok, can also mention dev plugins are needed for SRIOV as well
        - introduce the topic of Device plugins within issue 2255 - in the architecture
    - PR 2332: cedric proposed a new chapter between 6 and 7 with tables listing the K8S SIG features that are mandatory or not.
        - merged!
        - last meeting's notes:
            - will require restructuring and opening a number of issues to track all SIG features that are in scope of RA2, if accepted
            - Conformance =. CNCF conformance, is a subset of the overall set of CNTT tests (~300)
            - test cases source is e2e test framework - integrated with functest as framework
            - test cases are divided by sigs - ref. https://build.opnfv.org/ci/job/functest-kubernetes-latest-daily/
            - After merging, Cedric Ollivier to author the tables for SIGs that have tests already specified
            - RA2 team to specify, for each feature, whether it's mandatory or not - some items may require fleshing out
            - idea is for RC2 to sync automatically with content of table once it's completed
        - next steps: Riccardo Gasparetto Stori to fix index, add remaining SIG tables, and map ch4 specs to mandatory features
    - Kubernetes external network orchestration discussion in CNCF CNF WG: https://github.com/cncf/cnf-wg/discussions/118
- AOB & Project review
    - https://github.com/cntt-n/CNTT/projects/10
    - Issues https://github.com/cntt-n/CNTT/issues/2341 and https://github.com/cntt-n/CNTT/issues/2349 - Target kubernetes version and accepted API versions
        - Can we target 1.21 for Kali?
        - Must decide on a generic policy to define which APIs are acceptable
        - Suggestion is to keep upstream API versions (ie v1)
        - first we should decide on which APIs RA2 needs, then for each one, decide on the release.
- Permanent FYI
    - CNF Working Group within CNCF - https://docs.google.com/document/d/1YFimQftjkTUsxNGTsKdakvP7cJtJgCTqViH2kwJOrsc/edit
        - This also incorporates the previous requirements gathering exercise
- Actions/Next steps
    - June 7/10 virtual Face to Face - will need to come up with a list of topics to discuss, to inform the wider community and get feedback
        - Feb vf2f: https://wiki.lfnetworking.org/display/LN/2021+February+Developer+Topic+Proposals#id-2021FebruaryDeveloperTopicProposals-AnuketTopics
    - Next week meeting to be canceled.
