

Self Release

What is it?

The self release process enables any participating software project to have releases separate from the major Anuket releases.

Announcement of Self Releases

Inclusion in a Major Release

Projects using the self release process may include a previously announced self release in a major Anuket release, as follows:

1. Project selects intermediate release for inclusion in an Anuket release and presents it to the TSC for review.
 - a. Must complete review by M4
 - b. Presentation to TSC should include topics found in project release plan template
