Project Release Planning Template

> ⓘ **Info**
>
> **PLEASE FOLLOW THESE INSTRUCTIONS**
>
> 1. The content of this template is expected to be filled out for the M1 Release Planning Milestone.
> 2. Use the "Copy" command, available under the ..., top right of this page, to copy this template into your project wiki. Be sure to set the "Parent page" field correctly for your project wiki.
> 3. After you have successfully copied this template into your project wiki, you may delete this info box.

Overview

Project Name	Enter the name of the project
Target Release Name	Enter the name of the release you are targeting to deliver (e.g., Jerma)
Project Lifecycle State	TBD

Scope

High level description of the goals for the project

Requirements

Provide a list of features or use cases, documented as Epics or Stories in Jira. Use the Jira issue insertion feature for Confluence.

Release Artifacts

Indicate the work product (Executable, Source Code, Library, API description, Tool, Documentation, Release Note, etc) for this release.

Name	Description	Format (Container, Compressed File, etc.)

Architecture

High level architecture diagram

Insert diagram or link.

Internal Dependencies

List any Anuket projects on which this release is dependent and describe the dependency.

External Dependencies

List any external dependencies (OpenStack, ODL, etc.). Include specific versions, if relevant.

Test and Verification

Describe how the project will be tested and verified.

Risks

List any risks and a plan to mitigate each risk.

Risk Description	Mitigation Plan
