5 min	☒ Kali Release Status and Lakelse process update Kali Release Calendar (Approved as proposed) - Check on M3, 01 Jun 2021 - Lakelse schedule proposal - Review of release process at Dev & Test Forum	David McBride Al Morton Walter Kozlowski	Kali: - We're at MS3 - where all the important issues should have been resolved. Please update JIRA to reflect the latest status of the work. For any project that has not completed their high-prio work (per Jira), Al Morton will create a wiki vote for a waiver for the project. - Specification side: is in MS3, content freeze, streams on track - Functest Kali is already released and is not concerned by any wiki vote for a waiver for the project or high-prio work (per JIRA). Lakesle: David McBride reviews current schedule, with kick-off today and sign-off by Dec/7. There is some overlap between Kali and Lakelse. There are still open questions on the definition of M3 and M4. See details in Release Process Milestone Planning. - TSC APPROVES the schedule for Lakelse. Cedric notes that he approves the schedule but still sees a need to better define the milestones M3/M4. Further clarification to be done as part on Friday's release meeting whe, M3 or M4 would be discussed
5 min	☒ Update on Weekly Technical Discussion	Gergely Csatari	No meeting this week

10 min	• Workstream Leads/Project PTLs standup ☑ on e or two sessions each, please, write n (add notes) unless discussion needed ☑ Pod resources evolving ☑ Approval of student volunteer letter	WSLs/PTLs • Sridhar Rao mentions that CIRV-SDV and Vineperf are 2 days behind schedule but will get patches in in time. • Sridhar Rao reports that the 4 Anuket Interns have started work today, with a kick-off meeting - each Intern has been given their schedule. • "Student volunteer letter" will be covered next week. • Cedric Ollivier Functest Wallaby and Functest Kubernetes v1.21 were released last week. Waiting Jenkins to be up to keep releasing/maintaining Functest or Xtesting... • Trevor Cooper reports on discussions on "pod resources": Discussions are often in the details. What is required is an overall high-level view of what is available and required. Trevor will report back in a few weeks time.

5 min	☒ Feedback from GB meeting on 19 May 2021 ☒ Anuket-Assured to pic	Lincoln Lavoie	No specific feedback from the GB on the Anuket assured program. Program was presented mostly for information.
5 min	☒ Anuket marketing and Recruiting	Beth Cohen Bob Monkman	No update (neither Beth nor Bob were on the call).
1 min	☒ @ Aric Gardner	Trevor Bramwell	- OPNFV Jenkins is down since 4 days - Cedric will create a ticket.  Cedric Ollivier mentions the need for a discussion on proper LF infra maintenance (e.g. for Jenkins, see above, but also version updates for common infra, e.g. Python). This would be orthogonal to dealing with issues which are handled via support.linuxfoundation.org.

Action Items

- ☐ [Al Morton](#) [Jim Baker](#) Agreement on Industry Impact Metrics from our repos (about 4-5 objective measures) for technology - need a support ticket write-up.
- ☒ Al Morton schedule a few minutes at June 8 TSC (or later) for Amy Zwarico to introduce herself to the Anuket community.
- ☒ Al Morton create an offline vote for projects needing a one-week extension on Kali M3: Offline Vote: Does the Anuket TSC agree to one week extension on Kali M3 for the projects listed?
